Executive summary

Scrap crab

Introduction:

Scrap crab is an online marketplace web application designed to help users get the best market price available for their scrap or damaged vehicles such as cars, bikes, trucks, etc. It is basically a platform for selling or buying goods and services such as vehicles, tires, metals, glass, and plastic and also provides the nearest centre according to the user's location where they can get their vehicle scrapped. We provide the user/customer/guest a chatbot that helps them resolve any problem regarding the price, location, or any usage issue. Might there be any query that remain unresolved we've provided user with a webchat feature when they can directly contact us on whatsapp for further assistance.

Further more we've listed a form for the customer to provide us with the feedback of our service.

With the feature of upcoming notice our customer will be duly informed about the changes and the newly informed laws about the overall prices of your car and it's parts.

We've also provided an FAQ column to provide information about several things like "Car prices", "risks for selling your car without proper paperwork" etc.

We have divided the interface for our web application into two views that is the user and the guest view. The user can access every feature available on the website from the browsing the catalog to reaching us directly on WhatsApp for personal assistance and from going through the policies to requesting a pickup from our nearest testing center. Whereas, the guest can only use certain features such as getting notices, using chatbot for assistance, policies, etc. A guest can go through our website without any issues but they have to sign up to use all the features available. Due to the privacy policies of our company 'SCRAPCRAB' we don't allow visitors to renew policies, fetch the location, or use the webchat feature with the dealer/customer.

Objective:

The main objective of the project is to

Ensure that unfit vehicles are scrapped leading to less pollution and more growth opportunities for the automobile sector.

- Providing services such as buying/selling vehicles/vehicle accessories at the best market price.
- Website will manage the details of the customer and provides the nearest testing center.
- Provides certificates for the same.
- Provides information about government policies for scrapping vehicles.
- Allows Renewing of documents
- To remove the paperwork involved in learning.
- This website is built at Administrative-end and thus only administrators are guaranteed to access the data.

SCRAB CRAB

Chapter 1 – Introduction

1.1- Is the website affiliated with any organization?

The web application “SCRAB CRAB” is truly a project work done under the guidance of the mentor provided by the college; the website is not affiliated to any organization.

1.2- Objective of the Project

The main objective of the project is to ensure that unfit vehicles are scrapped leading to less pollution and more growth opportunities for the automobile sector.

- Providing services such as buying/selling vehicles/vehicle accessories at the best market price with full paperwork and all the legal formalities.
- Website will manage the private details of customer safely and provides a seamless experience in finding the nearest testing center and providing assistance 24*7.
- Provides certificates for getting your car scrapped with further provide you a discount on your next car purchase on many outlets.
- Provides information about government policies and notices for scrapping vehicles to make sure our customer is aware of the market.
- Allows renewing of documents for the life span of your vehicle legally.
- To minimize the efforts involved on your side our team will deal with all the paperwork.
- This website is totally built at Administrative-end and thus only administrators are guaranteed to access the data.

1.3- Methodology

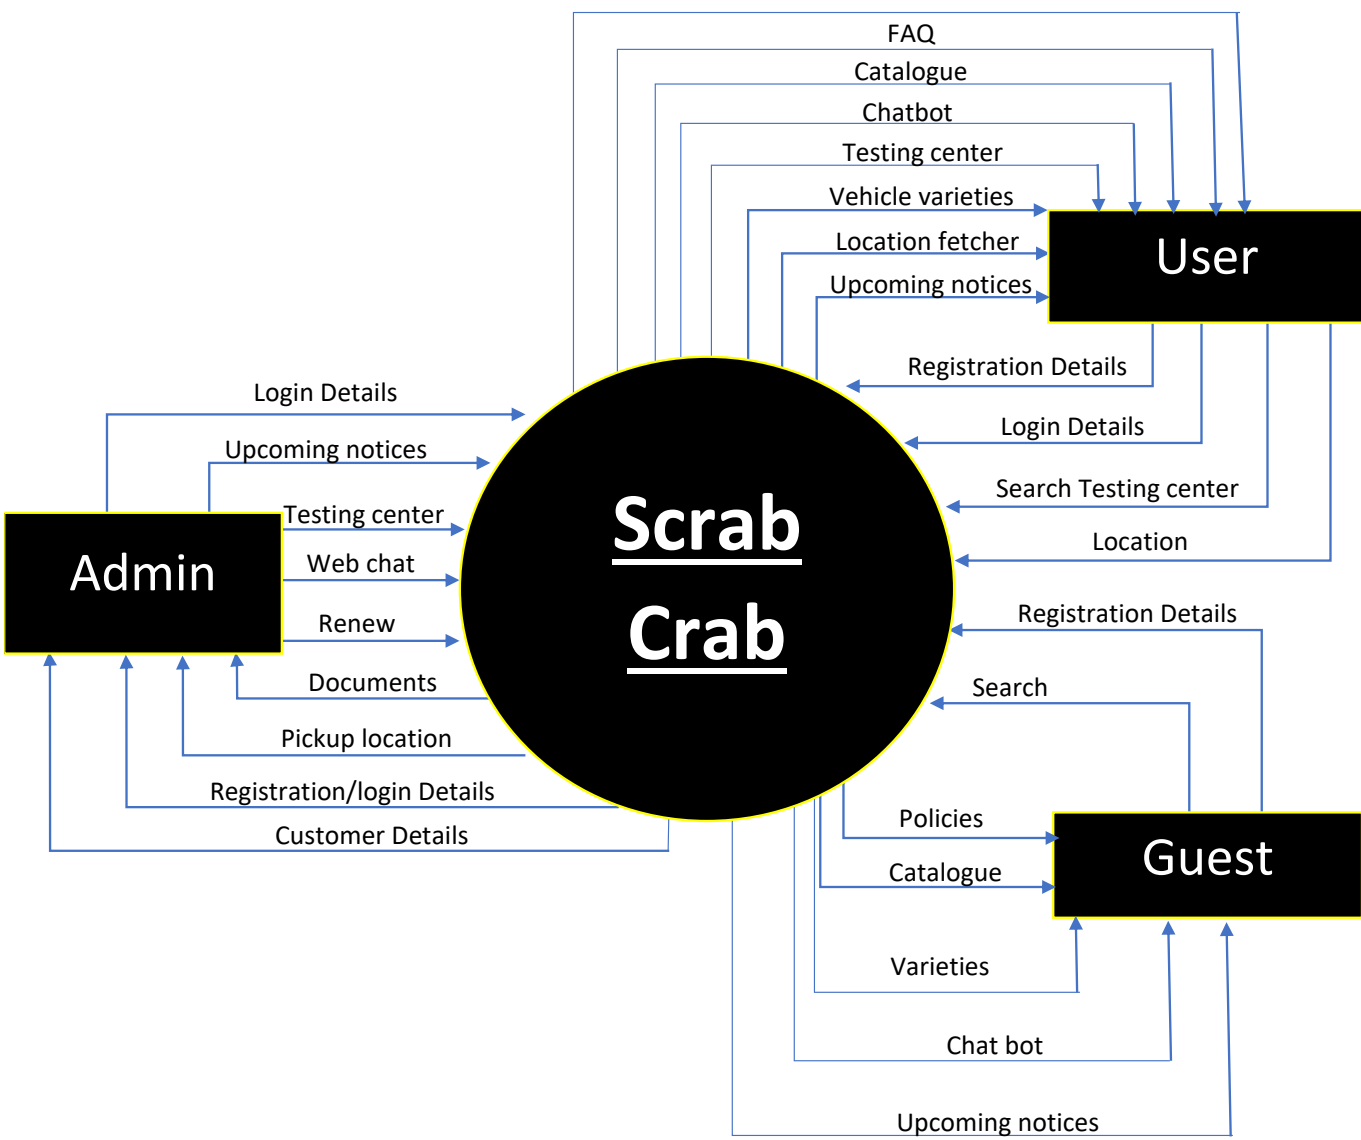

Fig 1

WORKING:

We have 15 modules, including the home page allowing a Guest User to have a look into our website.

By signing up a customer can use all the 15 modules as per the requirements. But as the website consists of 2 modes a customer can either have a look into the website or can sell/buy their vehicles or accessories as per one's need.

Looking more into the data flow diagram we get to know about the user mode, to become one a customer first needs to sign up and then log in to the website as a user.

After logging in the user is allowed to use every module of the website such as the catalogue, testing centres where one can fetch the details about available centres nearby, vehicle varieties to know about which accessory is available, and the types of vehicles such as 2-wheeler, 3-wheeler, 4-wheeler and more, upcoming notices telling the information about the policies/news in the real world as well as related to the website, FAQs having 3 categories i.e. scrap car price, RTO rules for selling cars in scrap, risk of selling a car without paperwork, including a chatbot which helps the user to resolve any problem regarding the price, location or any usage issue and can also use the web chat module where a user can directly communicate with the dealer. Also having a feature to contact us either with the help of WhatsApp, Facebook, Instagram, or mail or by just adding your details to the get instant call-back module.

In addition to the renew option a user needs to add his/her identity proof, address proof, RC, insurance and license picture to the admin.

Keeping privacy in mind SCRABCRAB doesn't allow a visitor to view policies, fetch the location or webchat with the dealer.

Another view is the guest view where a user can only have a look into our website by accessing the catalogue feature to know about the price we share and the market price. Variety module consisting of the varieties to know about which accessory is available, and the types of vehicles such as 2-wheeler, 3-wheeler, 4-wheeler and more, FAQs having 3 categories i.e. scrap car price, RTO rules for selling cars in scrap, risk of selling a car without paperwork, including a chatbot which helps the user to resolve any problem regarding the price, location or any usage issue.

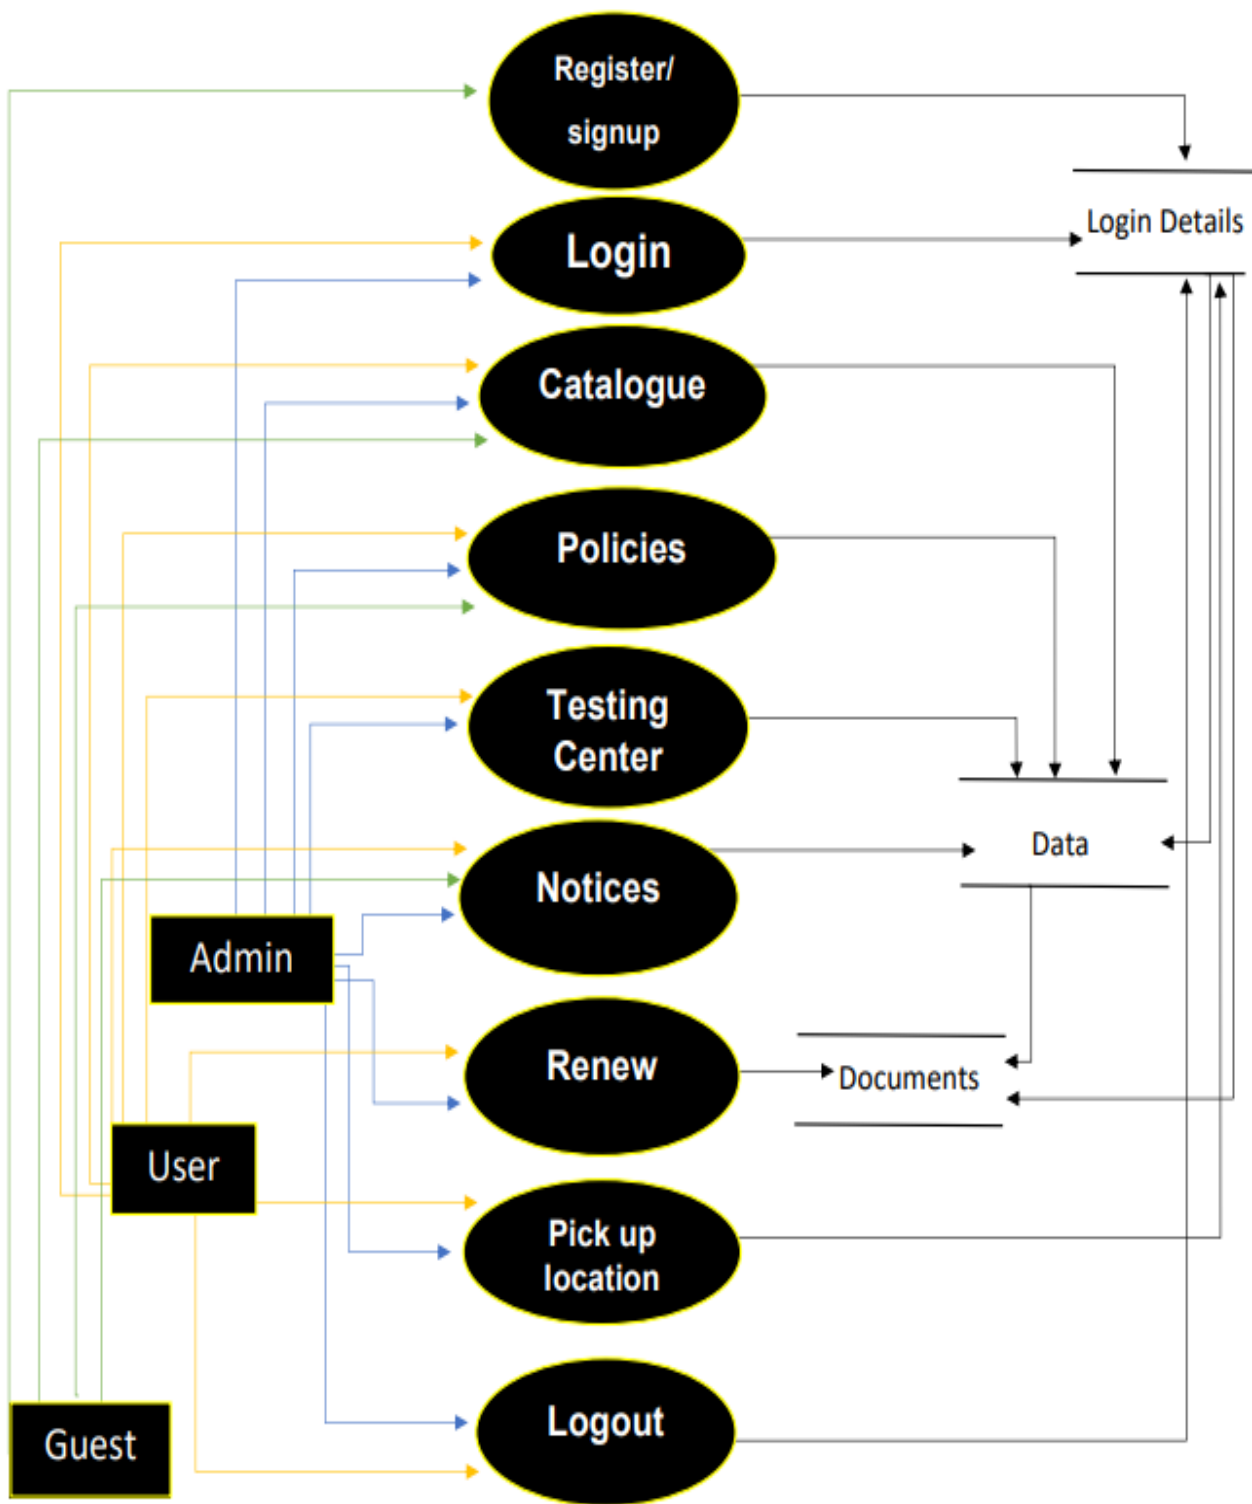

Fig 2

Chapter 2- System Requirement Analysis

2.1 Total Processes

The system homepage has 15 processes, mentioned below

1. Register/Signup

This module is used only by the guest user to register themselves and use the all the modules as per the requirements.

2. Login module

This module is used by the customers and the admin where the admin can get information about the customers and can also modify some specific modules when needed. And the customers can only use this module to login and get their data saved.

3. Search

This module helps the user to know about the price, location, accessories and many more just by searching redirecting to the web browser.

4. Catagoue

This module consists of the basic information of basic information about the website and the details about the market price/ website price and polices.

5. Contact us

This module allows a user to

6. Renew policies

Allows a user to renew their policies by adding

- Address proof
- Identity proof
- RC
- License
- Insurance paper

7. Chatbot

This module conducts a conversation with a user using textual or auditory methods. Trying to resolve the issues faced by them regarding the website.

8. Upcoming notices

This module consists of the notices about the website price and the market price, also all the important notices regarding scrapping in India.

9. Varieties

This module consists of the variety of vehicles available and the accessories related to them. Having the types of vehicles:

- 2-wheeler
- 3-wheeler
- 4-wheeler

11. Testing center

This module allows a user to know the nearest testing center available according to their location

12. Web Chat

This module helps a user to chat directly with the owner/admin.

13. Location fetcher

14. FAQ

This module includes of 3 categories i.e. scrab crab price, RTO rules for selling cars in scrap, risk of selling a car without paperwork, including a chatbot which helps the user to resolve any problem regarding the price, location or any usage issue

10. Logout

This module is used to logout safely from the website.

3.1 PHYSICAL DESIGN

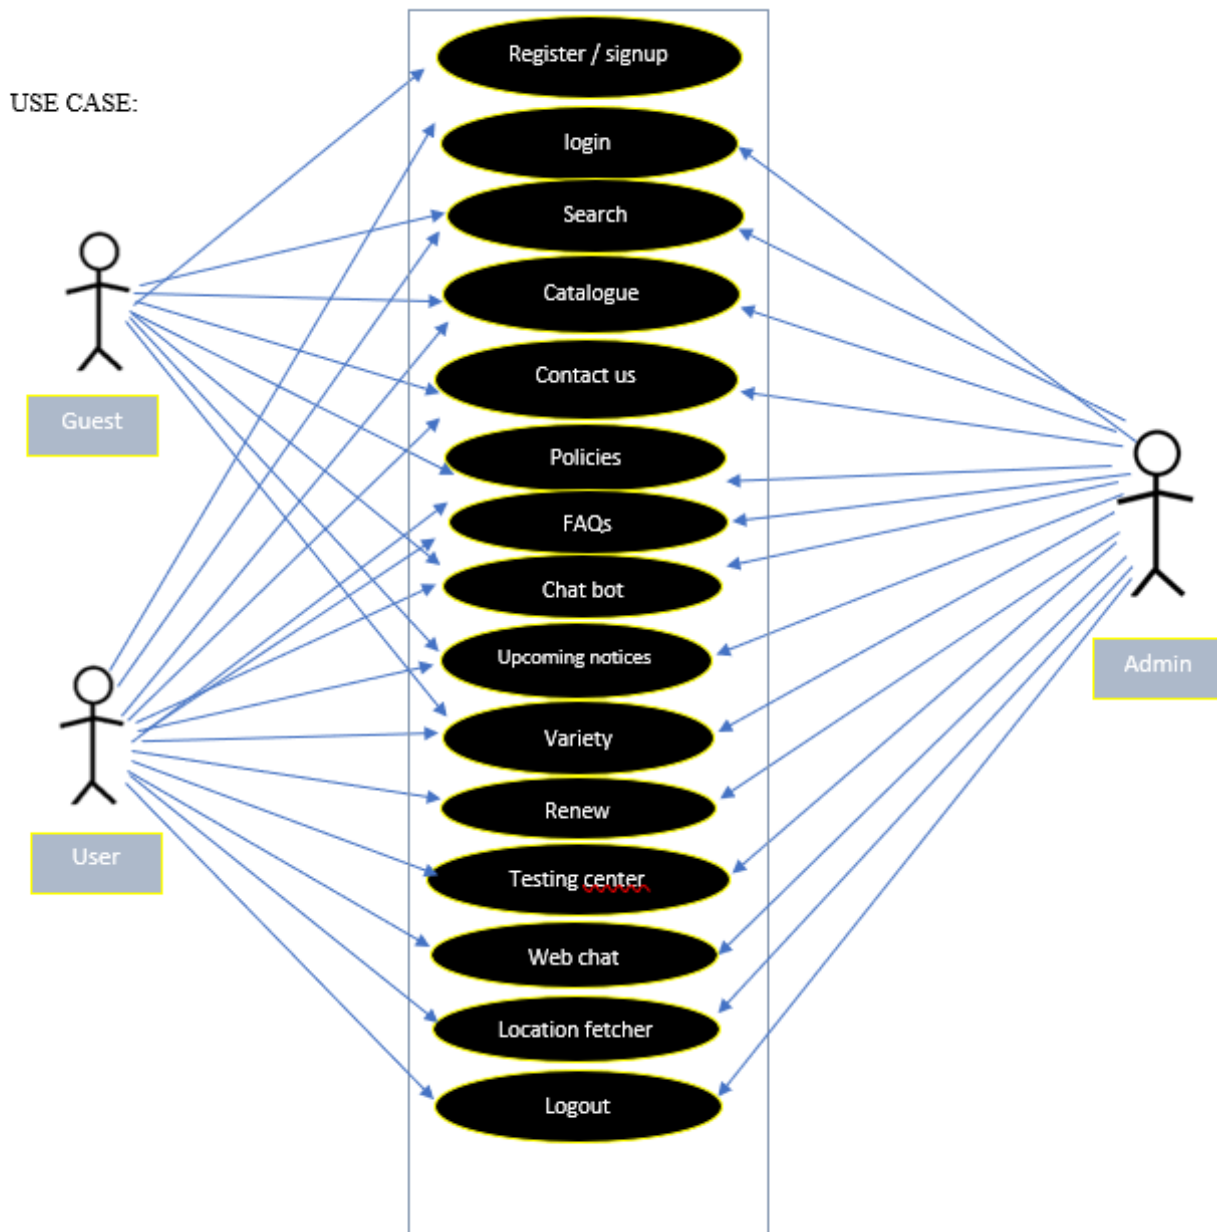

ILLUSTRATION THROUGH USE CASE DIAGRAM

- Relationship between input, output, processes and entities illustrated through data flow diagrams(level-0)

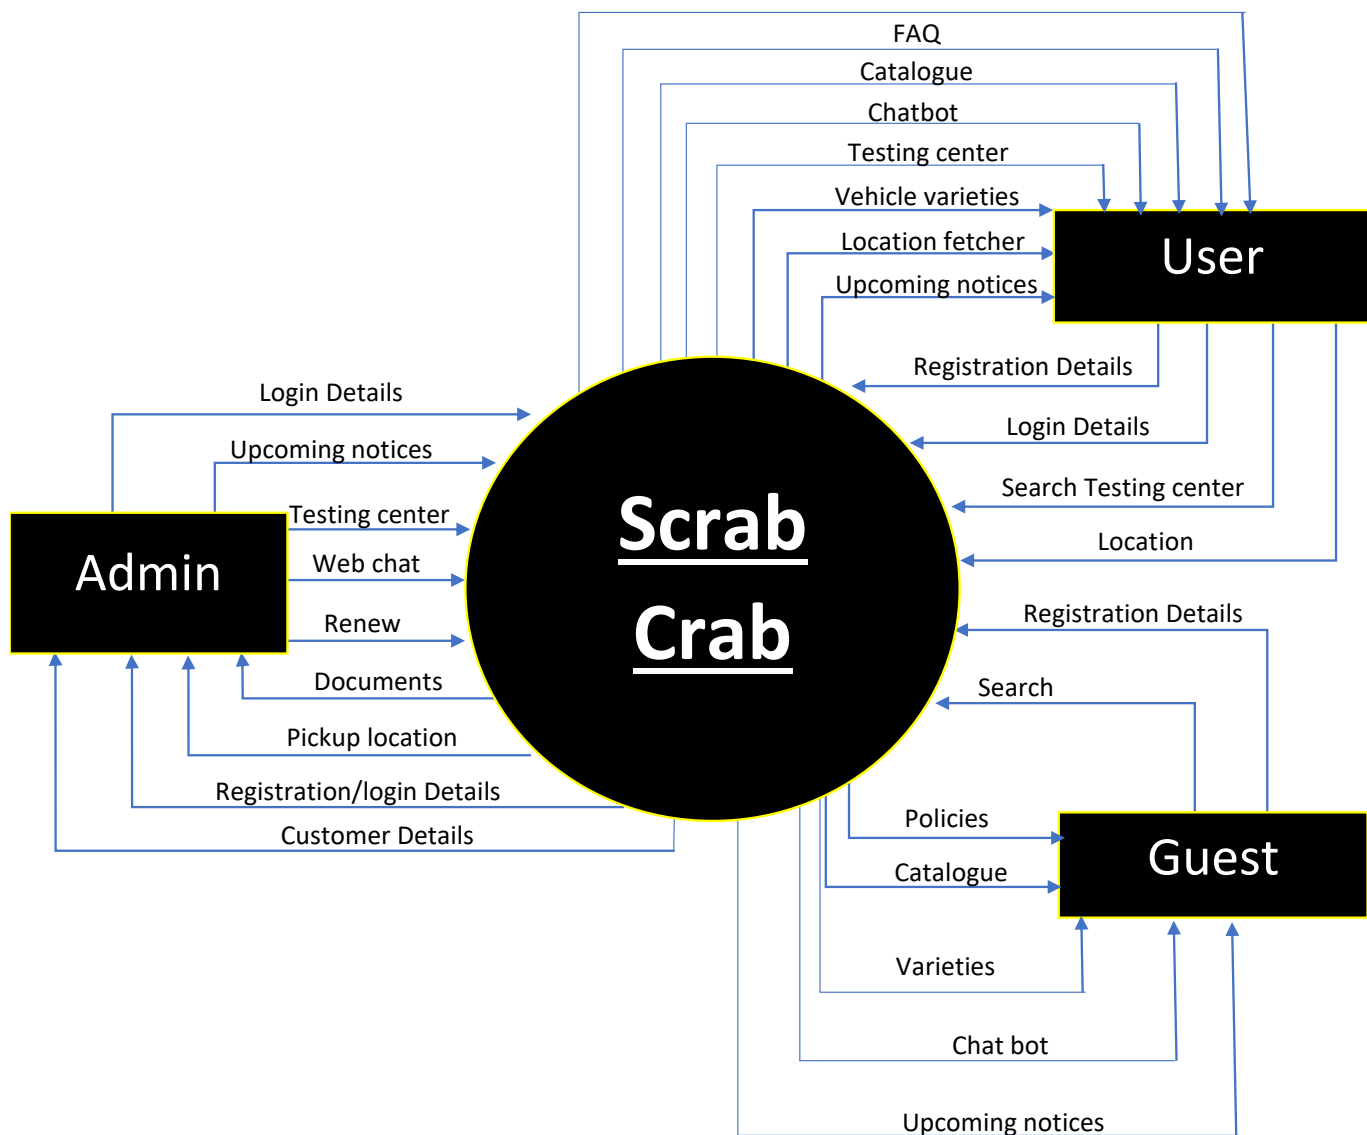

ILLUSTRATION THROUGH DATA FLOW DIAGRAM (LEVEL-0)

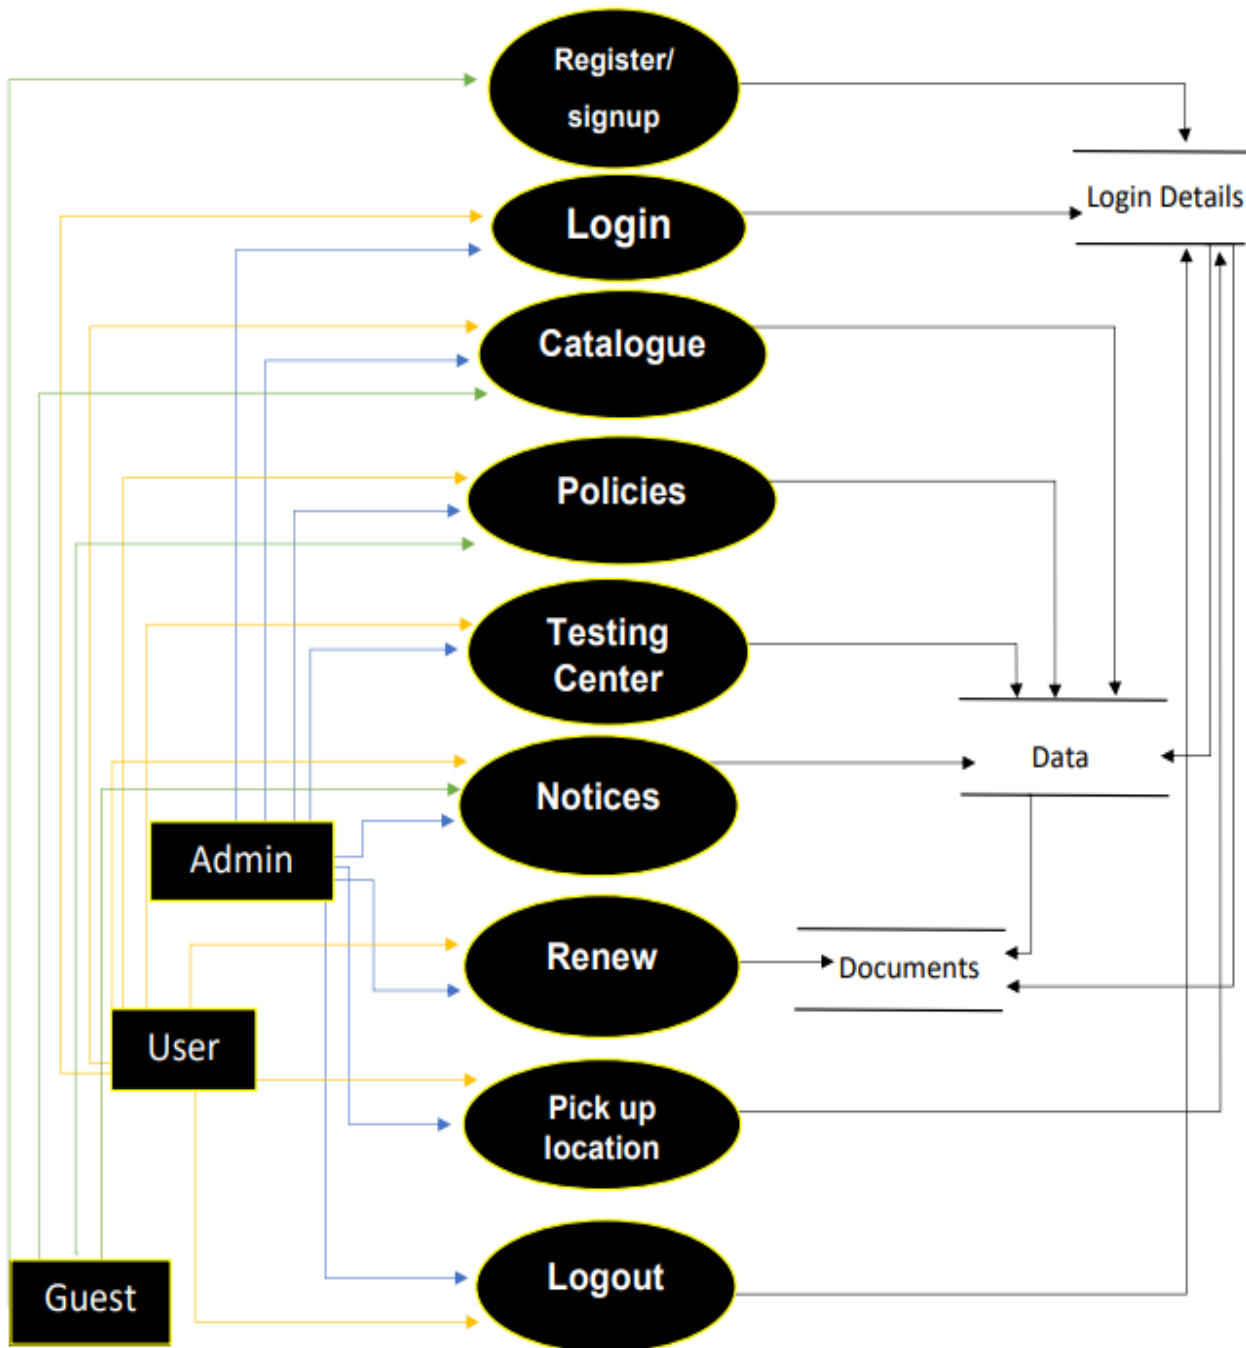

ILLUSTRATION THROUGH DATA FLOW DIAGRAM (LEVEL-1)

From the above diagram it's been easily conclude that a user has to Register/signup but on the contrary if the client doesn't want to share his/her details they can access our-

- (1) Catalogue
- (2) Search
- (3) Policies

- (4) Contact us
- (5) Upcoming events
- (6) Varieties
- (7) Chatbot
- (8) FAQ

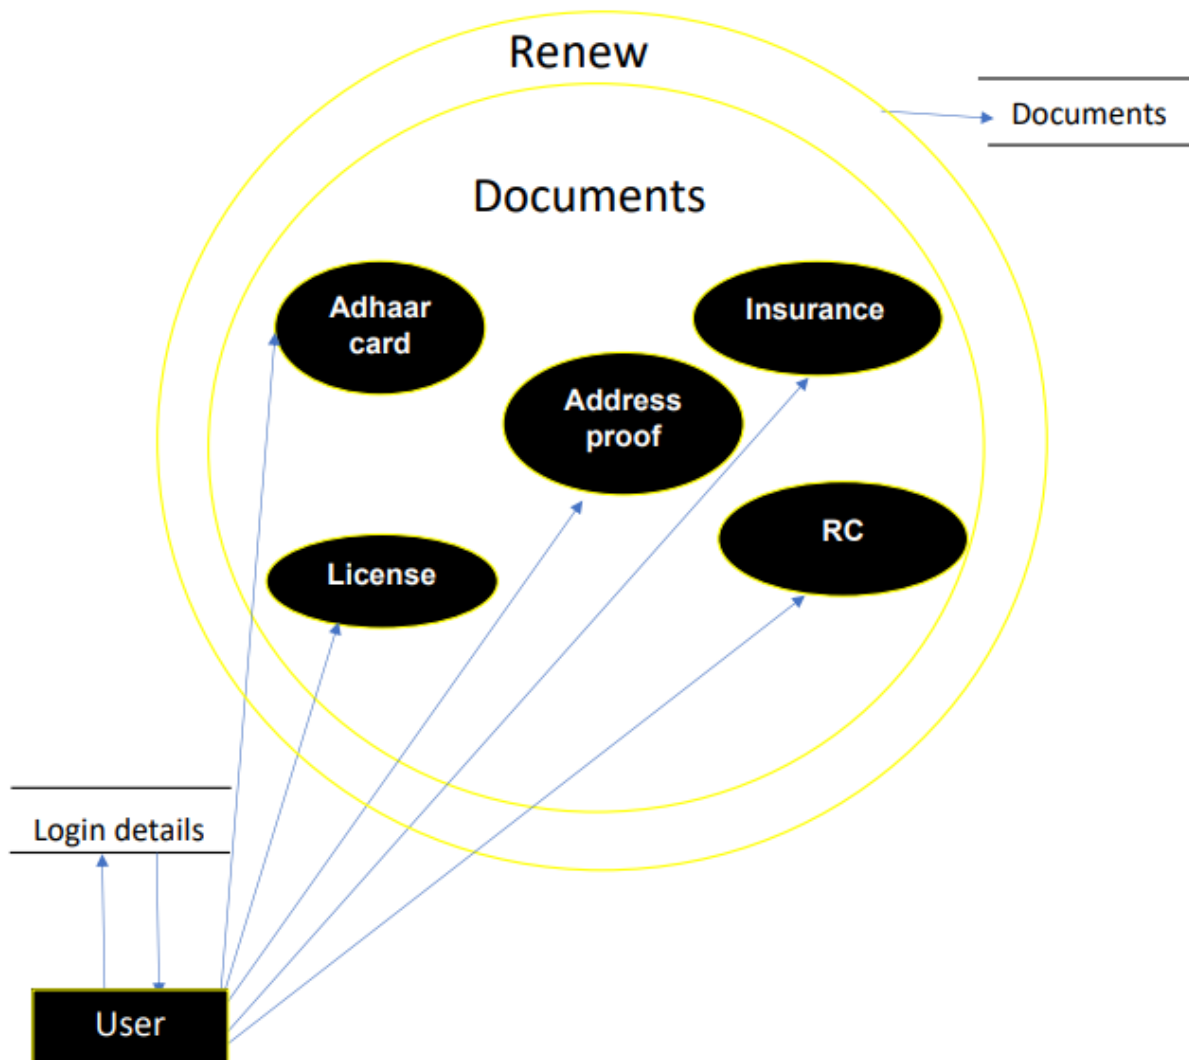

ILLUSTRATION THROUGH DATA FLOW DIAGRAM (LEVEL-2)

•There are some modules that can't be accessed without users' Register/sign-up details as they are connected with our data-base some of these are-

- (1) Renew Policies
- (2) Testing center
- (3) Web Chat
- (4) Location fetcher

Chapter 4- System's Development

4.1-Purpose

The soul-purpose of our web application is to make sure that the customer in our potential market get aware about the facts, news and notices about selling their vehicles a problem that generally appears. This website will provide assistance and guidance with selling their vehicles with proper paperwork and legal methods of scrapping step by step for a satisfactory experience. Providing the customer the best price possible for their damaged/destroyed vehicle.

This website is dynamically designed to allow the user to renew the vehicle time-span providing 24*7 chat bot services and personal services via webchat.

4.2-Programme Development

We have solely used HTML5, CSS, JavaScript, SQL, Bootstrap, php :

Html5,CSS: HTML and CSS are languages that give structure and style to web pages, and has been used for the front end.

JavaScript: JavaScript is a text-based programming language used both on the client-side and server-side that allows you to make web pages interactive. It gives web pages interactive elements that engage a user. Incorporating JavaScript improves the user experience of the web page by converting it from a static page into an interactive one. To recap, JavaScript adds behaviour to web pages.

Adding interactive behaviour to web pages

JavaScript allows users to interact with web pages. There are almost no limits to the things you can do with JavaScript on a web page – these are just a few examples which have been used while creating our website:

- Show or hide more information with the click of a button
- Change the colour of a button when the mouse hovers over it
- Slide through a carousel of images on the homepage
- Zooming in or zooming out on an image
- Displaying animations

SQL: Structured Query Language (SQL) is the standard and most widely used programming language for relational databases. It is used to manage and organize data in all sorts of systems in which various data relationships exist. SQL is a valuable programming language with strong career prospects.

We have used 3 databases: login details, documents , and data .

Login details consist of the signup/register module having entities -username, email id, password , login module having user name and password and logout module !

Data consists of all the policies , notices , testing center , catalogue , FAQ details .

And documents consisting the renew policies module having submodules such as the address proof , identity proof , RC , license , insurance papers .

Bootstrap: Bootstrap is an HTML, CSS & JS Library that focuses on simplifying the development of informative web pages (as opposed to web apps). The primary purpose of adding it to a web project is to apply Bootstrap's choices of colour, size, font and layout to that project.

Php : It is powerful enough to be at the core of the biggest blogging system on the web (WordPress)!It is deep enough to run large social networks!It is also easy enough to be a beginner's first server side language.

PHP is an acronym for "PHP: Hypertext Preprocessor"

- PHP is a widely-used, open source scripting language
- PHP scripts are executed on the server
- PHP is free to download and use

Chapter 5: System Implementation

5.1 Acquisition

5.1.1 Hardware requirements:

Component	Minimum	Recommended
Processor	1.9 gigahertz (GHz) x86- or x64-bit dual core processor with SSE2 instruction set	3.3 gigahertz (GHz) or faster 64-bit dual core processor with SSE2 instruction set
Memory	2-GB RAM	4-GB RAM or more
Display	Super VGA with a resolution of 1024 x 768	Super VGA with a resolution of 1024 x 768

Table 1

5.1.2 Software requirements:

The web application can run in any of the following web browsers running on the specified operating systems:

Microsoft Edge (latest publicly released version) running on Windows 11, Windows 10, Window 8.1
Windows 8.1, Windows 8 ,Windows 7

Mozilla Firefox (latest publicly released version) running on Windows 11, Windows 10, Windows 8.1
Google Chrome

Google Chrome (latest publicly released version) running on Windows 11, Windows 10, Windows 8.1

Google Chrome (latest publicly released version) running on the two latest publicly-release Mac OS
versions, Apple Safari

5.1.3 Network requirements:

Bandwidth greater than 50 KBps (400 kbps)

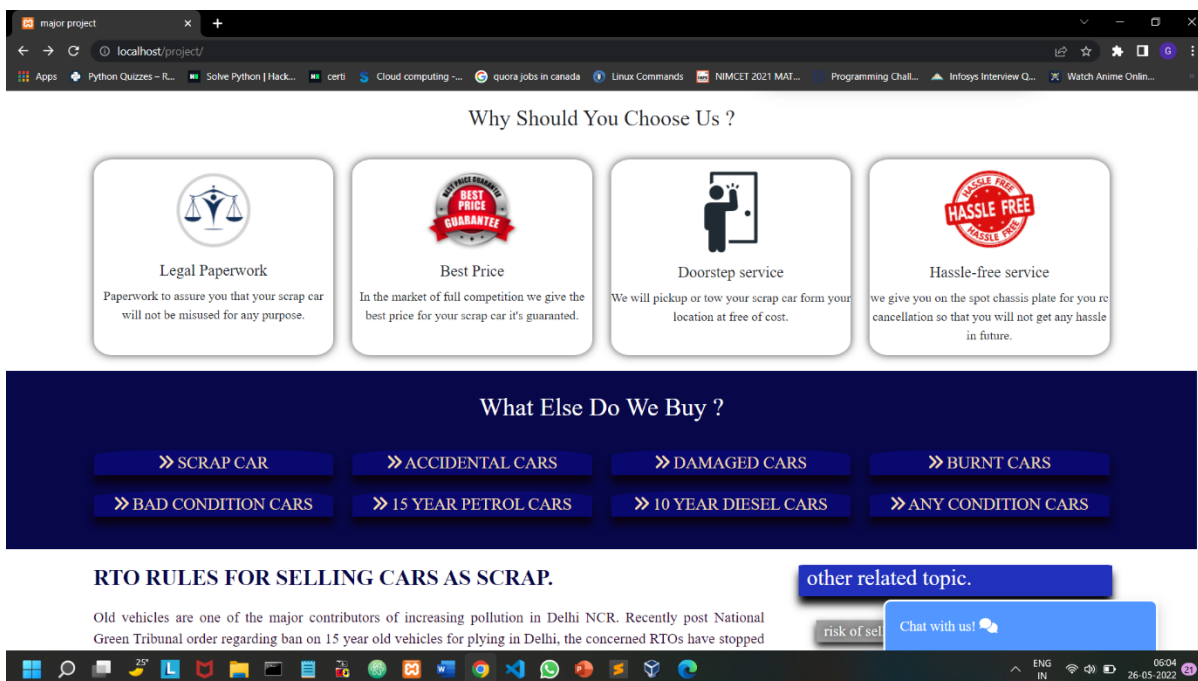

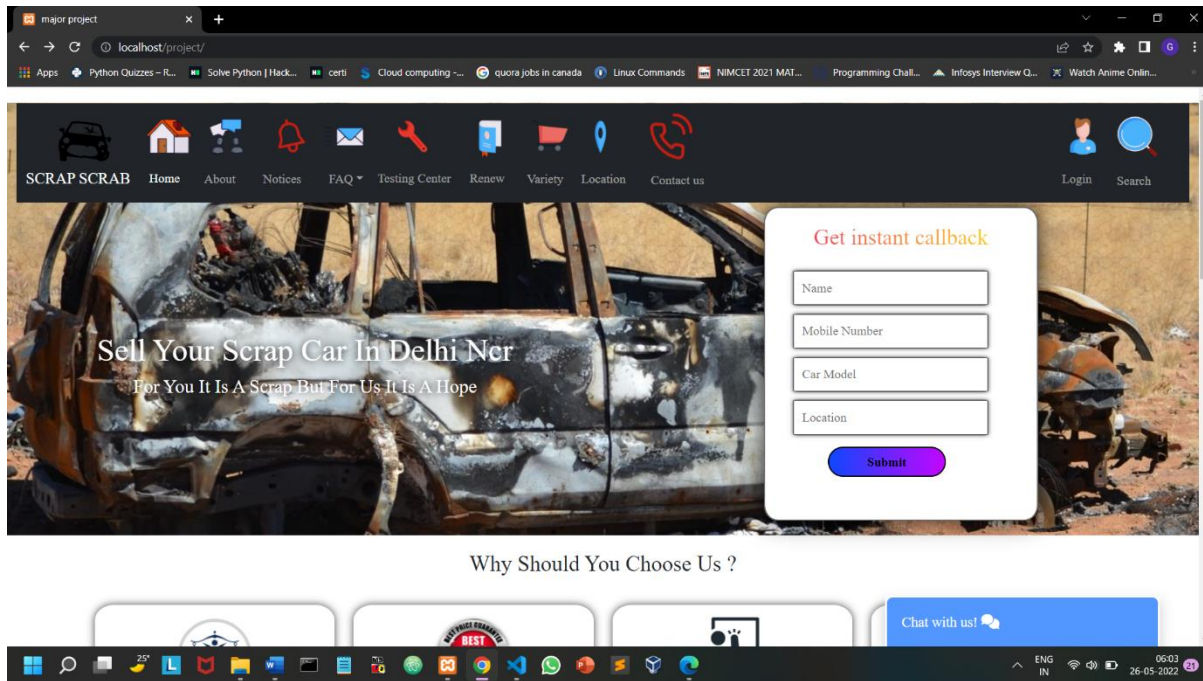

Latency under 150 ms

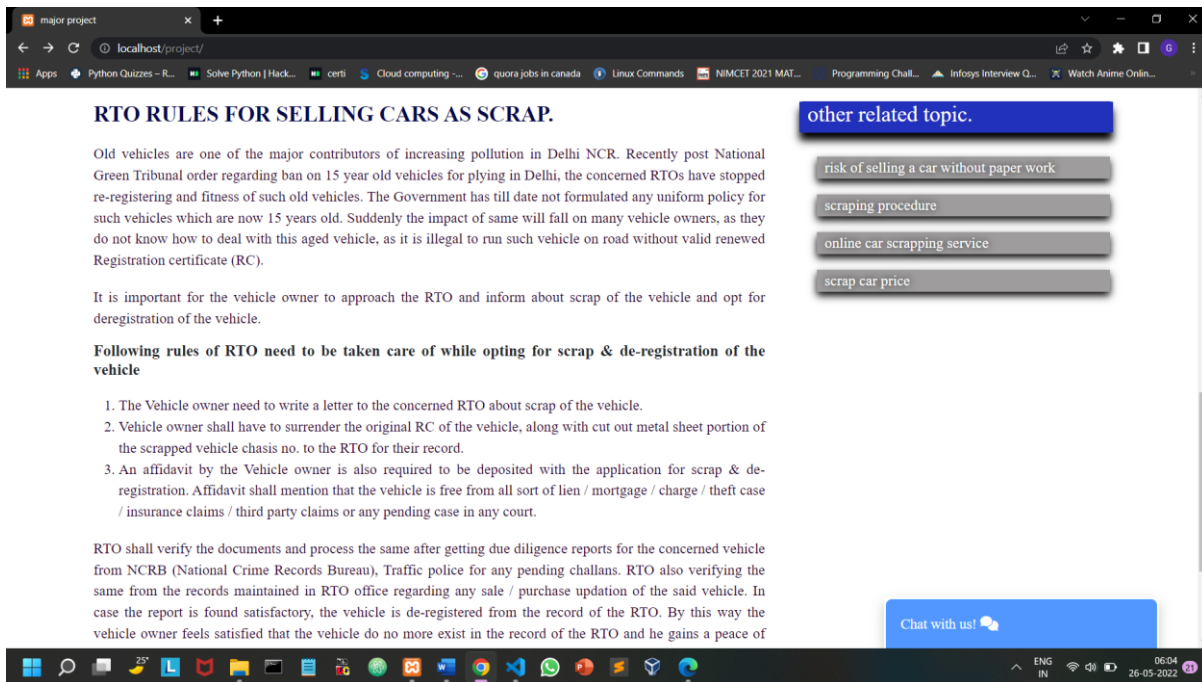

5.2 Training requirements

As per the training requirement, no training is needed because the system is designed to overcome the difficulties faced by students, therefore no special training period is required.

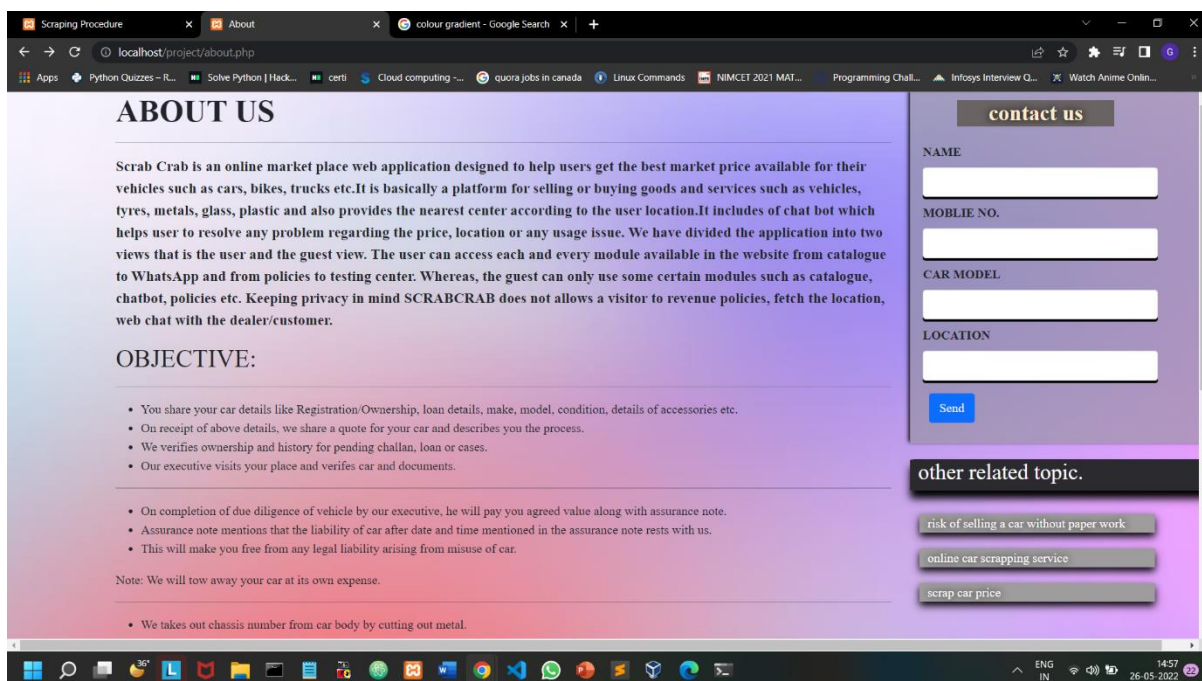

Chapter 6: Output and Implementation

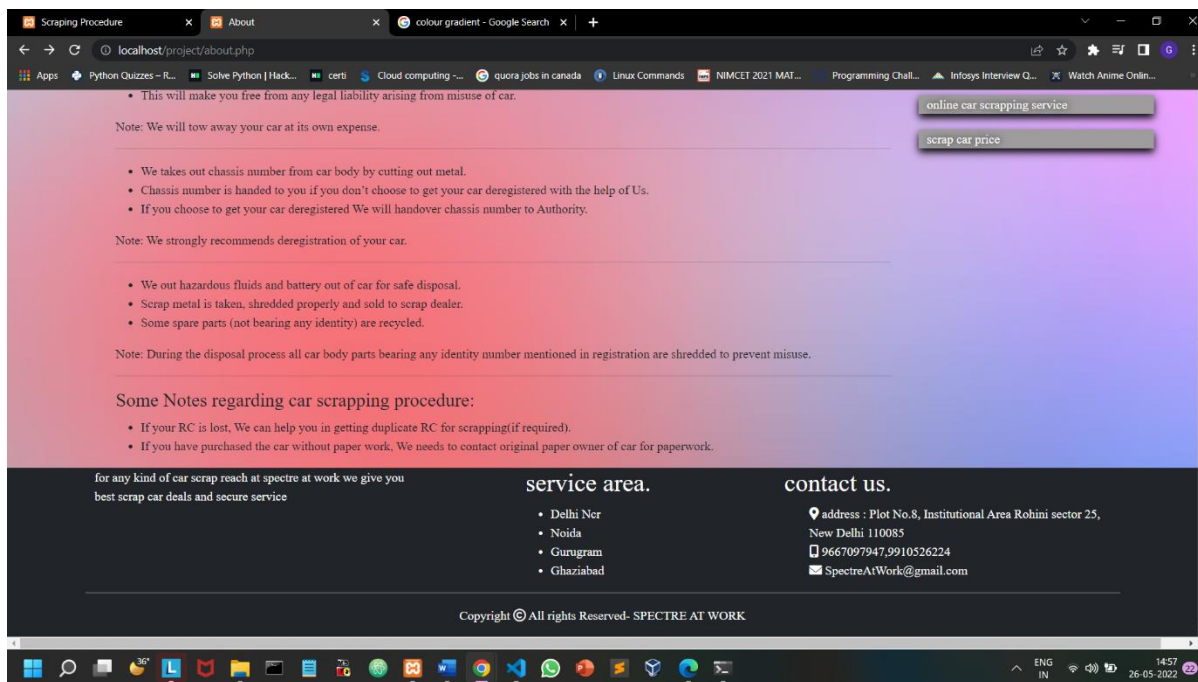

6.1 Home Page

6.2 About Page

6.3 Notices

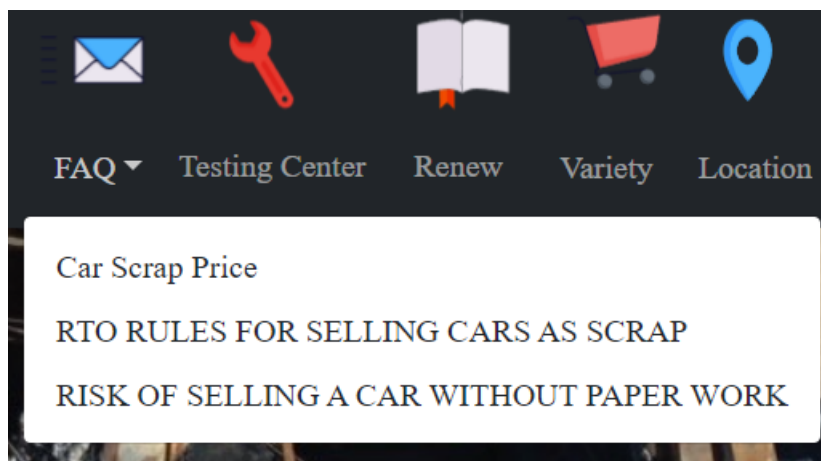

Upcoming Notices

Notice Branch Traffic Enforcement System

When will the policy come into effect

The vehicles that are older than 20 years will be deregistered from 01 June 2024 for the private vehicles. It will happen only when they have failed the test or the registration certificate has not been issued. The Income-tax department has issued notices to over 50 car dealers, asking them to furnish details of customers who have bought cars after November 8, following the demonetisation of 500- and 1,000-rupee currency notes. The notices are being sent under Section 133(6) of the Income Tax Act, 1961, which empowers the I-T authorities to seek information that could be useful in connection with any pending proceeding or enquiry. Confirming the development, a senior income-tax official said that the department has observed a significant increase in car sales during the past two months. "This is part of an exercise in which we checking the use of junk old notes and also tax evasion through such buying," the official said. The I-T notices call upon car dealers to provide details of customers along with their addresses, make and model numbers of the four-wheelers they've bought, invoiced cost, booking dates, among other details. ADVERTISING The department also has asked car dealers to provide ledgers of all customers who have booked vehicles from November 1 till date, along with bank account details with statements during that period. The notices advise car dealers not to tender demonetised currencies for any such transactions and inform the tax authorities in case customers ask for such deals through old notes. In the backdrop of the demonetisation drive, the department suspects that the old currency has been used to buy cars, an income-tax source said. Such customers shall be under the scrutiny of the department after December 30, he added.

6.4 FAQs

RISK OF SELLING A CAR WITHOUT PAPER WORK

It is common to resale a car to second hand or even third hand owner. Car ownership transfer is a time consuming process. This leads to avoid of paper work while selling a car. But selling a car without paper work is risky as explained below. Also see (is it safe to sell your car to any Mayapuri scrap Dealer)

- New owner can use it in illegal way or for criminal activities, the actual owner may be considered involved in illegal or criminal activity.
- New owner is a trustworthy person but s/he further sells or lends the car to someone who uses it illegally. This is a common case, specially when a car is sold to a person with rural background. As it is quite common in rural India to lend or even sell a car without paperwork.
- All the challan will still reach your home. Challan are always send to RC address. And legal responsibility of paying the challan will still lie with you.
- You will be directly contacted by law enforcement bodies for questioning for misuse. Like when police investigates crime involving any motor vehicle, the owner is the first person questioned and treated like a suspect.

Selling a car to a used car dealer

1. Ensures the dealer is trustworthy and reputed. Don't sell your car to a dealer without background check.
2. Ensures that dealer don't sell this car to any other dealer. Some dealers sale cars further to other dealers in other states or remote areas. It is risky as you cannot verify the background of a new dealer.
3. Dealer should sign an assurance note mentioning date and time of sale. Assurance note should be retained by even after transfer of RC. This will make you safe from issue arising due to some indecent which occurred after sale and before transfer of the car.
4. It is also good to get signed proof of sale like receipt. This will further strengthen the assurance note and can be considered as a proof in court of law.
5. Keep asking status of car from dealer. You are entitled to know if car is successfully transferred or still parked at dealer end.

Selling a car directly to a new owner

1. Always do background check, like verification of ID proof of new owner before making a deal. You should be particularly careful while selling your car online using old product listing services. These sites also mention safety procedure for seller, you must read the mentioned guidelines.
2. Before handing over the car ensure application for transfer has been submitted to RTO and you have atleast one signed proof of

Selling a car for scrap

1. You are handed over an assurance note that car will not be used for running on road and it will be scrapped.
2. Chassis number is cut out from car and handed over to you or to RTO for cancellation of your RC.
3. You should also ensure that your car is actually scrapped, in case of resale of whole car the RC must be transferred.
4. Also ensure car scrap dealer is giving you competitive price for your scrap car. Check our [prices for scrap car](#).

Car Scrapping Procedure

This procedure ensures environment safety, prevent car misuse and recycle where ever viable. Read below to know the process for selling a car for scrap.

1. Selling a car for Scrap

- You share your car details like Registration/Ownership, loan details, make, model, condition, details of accessories etc.
- On receipt of above details, we share a quote for your car and describes you the process.
- We verifies ownership and history for pending challan, loan or cases.
- Our executive visits your place and verifies car and documents.

2. Scrap Deal and Paper work

- On completion of due diligence of vehicle by our executive, he will pay you agreed value along with assurance note.
- Assurance note mentions that the liability of car after date and time mentioned in the assurance note rests with us.
- This will make you free from any legal liability arising from misuse of car.

Note: We will tow away your car at its own expense.

3. Scrapping of the Car

- We takes out chassis number from car body by cutting out metal.
- Chassis number is handed to you if you don't choose to get your car deregistered with the help of Us.
- If you choose to get your car deregistered We will handover chassis number to Authority.

8	Polio/Swift	Diesel	Rs 41000
9	Tavera	Petrol	Rs. 37000+
10	Tavera	Diesel	Rs 42000+
11	Innova	Petrol	Rs 70000+
12	Innova	Diesel	Rs 80000+

NOTE: if you don't find your car's model listed then please call us and we'll let you know what it's worth based on the expertise of our qualified car value experts. Check below our scrap car prices.

Notes about car scrap prices:

- Car Scrap prices are indicative and prices may vary due to many factors like scrap metal prices (Steel, Aluminum, Lead and Copper scrap prices).
- Condition of car also matters. Cars badly damaged with rust will be valued lower than non-rusted car.
- If a car model goes out of production, its scrap prices go down as there parts are not usable and cannot be sold.
- Damaged glasses, body parts may also effect price of scrap cars, specially the cars which has good value in scrap like Swift and Innova.
- Charges to get your car RC cancelled by RTO is not included in this price. Which is optional.

Summary and Conclusion:

We have done some buyer target campaigns in the past. But, in the end buying is an easy thing which is happening for us, because there are thousands of sellers which are looking for good deals. I think we are at a good stage in the country where a lot of people are experimenting and doing good stuff. I think every brand has to start thinking along these lines and if they don't do it they will face tremendous amount of problems. Scrap is becoming one of the lead problems in our country which is to be seen on urgent basis. People need to scrap their cars so that new cars with better technology for pollution are to be driven. This is where our site comes in and make people scrap their cars at good money and easy way.

<div class="col-lg-8 col-md-12">

<h3 style="text-transform: uppercase; font-weight: bold; color:rgb(7, 7, 73); padding-top:20px;">rto rules for selling cars as scrap.</h3>

<p class="rto">Old vehicles are one of the major contributors of increasing pollution in Delhi NCR. Recently post National Green Tribunal order regarding ban on 15 year old vehicles for plying in Delhi, the concerned RTOs have stopped re-registering and fitness of such old vehicles. The Government has till date not formulated any uniform policy for such vehicles which are now 15 years old. Suddenly the impact of same will fall on many vehicle owners, as they do not know how to deal with this aged vehicle, as it is illegal to run such vehicle on road without valid renewed Registration certificate (RC).</p>

<p class="rto">It is important for the vehicle owner to approach the RTO and inform about scrap of the vehicle and opt for deregistration of the vehicle.</p>

<h5 style="text-align:justify;">Following rules of RTO need to be taken care of while opting for scrap & de-registration of the vehicle</h5>

<ol class="rto">

The Vehicle owner need to write a letter to the concerned RTO about scrap of the vehicle.

Vehicle owner shall have to surrender the original RC of the vehicle, along with cut out metal sheet portion of the scrapped vehicle chasis no. to the RTO for their record.

An affidavit by the Vehicle owner is also required to be deposited with the application for scrap & de-registration. Affidavit shall mention that the vehicle is free from all sort of lien / mortgage / charge / theft case / insurance claims / third party claims or any pending case in any court.

<p class="rto">RTO shall verify the documents and process the same after getting due diligence reports for the concerned vehicle from NCRB (National Crime Records Bureau), Traffic police for any pending challans. RTO also verifying the same from the records maintained in RTO office regarding any sale / purchase updation of the said vehicle. In case the report is found satisfactory, the vehicle is de-registered from the record of the RTO. By this way the vehicle owner feels satisfied that the vehicle do no more exist in the record of the RTO and he gains a peace of mind.</p>

<h1 style="font-weight:bold;">ABOUT US</h1>

<hr>

<p style="font-weight:bold; font-size:14pt;">

Scrab Crab is an online market place web application designed to help users get the best market price available for their vehicles such as cars, bikes, trucks etc.It is basically a platform for selling or buying goods and services such as vehicles, tyres, metals, glass, plastic and also provides the nearest center according to the user location.It includes of chat bot which helps user to resolve any problem regarding the

price, location or any usage issue. We have divided the application into two views that is the user and the guest view. The user can access each and every module available in the website from catalogue to WhatsApp and from policies to testing center. Whereas, the guest can only use some certain modules such as catalogue, chatbot, policies etc. Keeping privacy in mind SCRABCRAB does not allows a visitor to revenue policies, fetch the location, web chat with the dealer/customer.

</p>

<h2>

OBJECTIVE:

</h2>

<hr>

<ul class="font">

You share your car details like Registration/Ownership, loan details, make, model, condition, details of accessories etc.

On receipt of above details, we share a quote for your car and describes you the process.

We verifies ownership and history for pending challan, loan or cases.

Our executive visits your place and verifes car and documents.

<h2>

</h2>

<hr>

<ul class="font">

On completion of due diligence of vehicle by our executive, he will pay you agreed value along with assurance note.

Assurance note mentions that the liability of car after date and time mentioned in the assurance note rests with us.

This will make you free from any legal liability arising from misuse of car.

</ul class="font">

<p>Note: We will tow away your car at its own expense.</p>

<h2>

</h2>

<hr>

<ul class="font">

We takes out chassis number from car body by cutting out metal.

Chassis number is handed to you if you don't choose to get your car deregistered with the help of Us.

If you choose to get your car deregistered We will handover chassis number to Authority.

<p class="font">Note: We strongly recommends deregistration of your car.</p>

<h2>

</h2>

<hr>

<ul class="font">

We out hazardous fluids and battery out of car for safe disposal.

Scrap metal is taken, shredded properly and sold to scrap dealer.

Some spare parts (not bearing any identity) are recycled.

<p class="font">

Note: During the disposal process all car body parts bearing any identity number mentioned in registration are shredded to prevent misuse.

</p>

<hr>

<h4>Some Notes regarding car scrapping procedure:</h4>

<ul class="font">

If your RC is lost, We can help you in getting duplicate RC for scrapping(if required).

If you have purchased the car without paper work, We needs to contact original paper owner of car for paperwork.

</div>
